Non GAAP Measures

Certain non-GAAP measures and other operating metrics such as EBITDA and EBITDA margin presented in this Draft Prospectus are a supplemental measure of our performance and liquidity that are not required by, or presented in accordance with, Accounting Standards, Ind AS, US GAAP, or IFRS. Further, these Non-GAAP Measures and other operating matrices are not a measurement of our financial performance or liquidity under Accounting Standards, Ind AS, IFRS or US GAAP and should not be considered in isolation or construed as an alternative to cash flows, profit for the period / year or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Accounting Standards, Ind AS, IFRS or US GAAP. In addition, these Non-GAAP Measures are not a standardised term, hence a direct comparison of similarly titled Non-GAAP Measures and other operating matrices between companies may not be possible. Other companies may calculate the Non-GAAP Measures and other operating matrices differently from us, limiting its usefulness as a comparative measure. Although the Non-GAAP Measures and other operating matrices are not a measure of performance calculated in accordance with applicable accounting standards, our Company’s management believes that it is useful to an investor in evaluating us because it is a widely used measure to evaluate a company’s operating performance.

FORWARD LOOKING STATEMENTS

This Draft Prospectus includes certain “forward-looking statements”. We have included statements in the Draft Prospectus which contain words or phrases such as “will”, “aim”, “is likely to result”, “believe”, “expect”, “will continue”, “anticipate”, “estimate”, “intend”, “plan”, “contemplate”, “seek to”, “future”, “objective”, “goal”, “project”, “should”, “will pursue” and similar expressions or variations of such expressions, that are “forward-looking statements”. Also, statements which describe our strategies, objectives, plans or goals are also forward looking statements. All statements regarding our expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our business strategy, plans, revenue and profitability (including, without limitation, any financial or operating projections or forecasts) and other matters discussed in this Draft Prospectus that are not historical facts. However, these are not the exclusive means of identifying forward-looking statements.

All forward looking statements are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement. Forward-looking statements reflect our current views with respect to future events and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Important factors that could cause actual results to differ materially from our expectations include but are not limited to:

1. Our business is subject to extensive government regulation, which may restrict the types of services we are permitted to issue or result in additional tax or other costs that reduce our revenues and earnings. Our inability to receive or renew the necessary licenses, approvals and registrations in a timely manner or at all may lead to interruption of our Company’s operations
2. We may fail to attract and retain sufficiently trained employees to support our operations, as competition for qualified personnel is intense and we experience significant employee turnover rates.
3. Due to the nature of the staffing services business, we may be exposed to employee-related risks, claims and losses that could have an adverse effect on our business and reputation.
4. If our existing clients do not renew their agreements with us, or expand the scope of services we provide to them, or if our long-term relationships with some of our largest clients are impaired or terminated, our revenue could decline, and our results of operations would be adversely impacted
5. Our failure to perform in accordance with the standards prescribed in our client contracts could result in loss of business or payment of liquidated damages.
6. If we do not set optimal prices for our service offerings, our business, financial condition, and results of operations could be adversely affected.
7. If we are unable to attract new customers, retain customers at existing levels or sell additional services to our existing customers, our revenue growth will be adversely affected.

For a further discussion of factors that could cause our actual results to differ, refer to section titled “Risk Factors” and chapter titled “Management’s Discussions and Analysis of Financial Position and Results of Operations” beginning on pages 25 and 222 respectively. By their nature, certain market risk disclosures are only estimates’ and could be materially different from what actually occurs in the future. As a result, actual future gains or losses could materially differ from those that have been estimated.

There can be no assurance to investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements to be a guarantee of our future performance.

Neither our Company or our Directors or our Officers or Lead Manager or Underwriter nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come

to fruition. In accordance with SEBI requirements, our Company and the LM will ensure that investors in India are informed of material developments until such time as the grant of listing and trading permission by the Stock Exchange for the Equity Shares allotted pursuant to this Issue.

Materiality

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

- *Some events may have material impact quantitatively;*
- *Some events may have material impact qualitatively instead of quantitatively;*
- *Some events may not be material individually but may be found material collectively;*
- *Some events may not be material at present but may be having material impact in future.*

INTERNAL RISK FACTORS

1. Our failure to perform in accordance with the standards prescribed in our client contracts could result in loss of business or payment of liquidated damages.

Non-compliance with contractual obligations, regulatory requirements, and changing standards exposes us to contract termination, loss of business, financial penalties, and reputational damage. Our agreements with clients, particularly banks and financial services companies, impose obligations to adhere to specific codes of conduct, frameworks, rules, and regulations. Failure to comply can result in termination of contracts, leading to the potential loss of valuable business relationships and revenue streams. It may also give rise to legal disputes, straining our financial resources and damaging our reputation.

Additionally, non-compliance with regulatory requirements can subject us to legal and regulatory actions, including fines, penalties, and sanctions imposed by relevant authorities. These consequences can have a material adverse impact on our financial position, profitability, and overall business operations. To ensure compliance, we may need to allocate substantial resources, both financial and operational, for investments in technology, infrastructure, personnel training, and third-party services. The associated costs can strain our financial resources and reduce profitability.

Furthermore, the regulatory landscape is dynamic, with new laws, regulations, and industry standards being introduced or amended. Adapting our operations to comply with these evolving requirements can be complex and time-consuming. Failure to timely and effectively adapt to regulatory changes may expose us to compliance risks, legal actions, and reputational harm. Non-compliance risks are inherent in our industry, and despite our efforts, there is no guarantee of full compliance at all times. Failure to adequately address and mitigate these risks may have negative impacts on our business operations, financial performance, and reputation.

2. Uncertainty of Client Commitment and Potential Contract Termination.

Our business is exposed to significant risks associated with the termination of client contracts, as these contracts can be terminated without cause by providing a short notice period, sometimes as brief as one month. This lack of contractual commitment regarding notice period increases the vulnerability of our business to sudden disruptions and revenue loss. Furthermore, our contracts, particularly those related to our flexi staffing solutions, do not include any specific volume commitments or assurances of future work. This lack of volume commitment exposes our business to revenue uncertainty, as the level of business we receive from these clients remains subject to their discretionary decisions and market conditions. The dependence of our business on the decisions and actions of our clients amplifies the risks we face. Numerous factors related to our clients, which are beyond our control, have the potential to result in contract termination or client loss. For example, clients may experience changes in their strategic priorities, leading to a reduced focus on staffing solutions and a subsequent decrease in their spending with our company. Such shifts in priorities can be influenced by external market conditions, financial constraints, or changes in industry trends.

Moreover, our clients may demand price reductions, exerting downward pressure on our profit margins. This could result from their own cost optimization initiatives or competitive pressures they face. Compliance with such demands may impact our profitability and financial performance.

Another risk lies in the possibility of clients changing their strategy and opting to move more work in-house or to our competitors. This shift in outsourcing strategy can lead to the termination of contracts with us, potentially resulting in a decline in our revenue and market share.

It is important to recognize that our business has limited control over the decision-making processes of our clients. Factors such as management changes, mergers, acquisitions, or shifts in their own business strategies can trigger contract terminations without advance notice, leaving us vulnerable to sudden revenue disruptions.

For further details of our business, please refer section titled “Our Business” on page 118 of this Draft Prospectus.

3. *Our recent rapid growth may not be indicative of our future growth, and, if we continue to grow rapidly, we may not be able to manage our growth effectively.*

Our company faces inherent risks associated with the uncertainty of future growth and the effective management of rapid expansion. Firstly, rapid growth may strain our ability to manage the expansion effectively. The increased scale and complexity of our operations could lead to inefficiencies, errors, and operational disruptions. Secondly, rapid expansion exposes us to compliance and legal risks. Failure to comply with applicable laws, regulations, and industry standards may result in legal consequences, financial penalties, or reputational damage. Lastly, there are inherent business and operational risks associated with rapid growth, including supply chain disruptions, increased competition, and difficulties in maintaining quality standards.

Furthermore, financial risks arise from the need for substantial investments and effective management of financial resources. Talent acquisition and retention may also become challenging during rapid expansion, impacting our ability to attract and retain qualified employees. Additionally, market volatility and uncertainty pose risks as changes in market conditions and customer preferences can affect the demand for our services. It is crucial for us to assess and mitigate these risks to ensure the long-term success and sustainability of our company.

4. *Our business is subject to extensive government regulation, which may restrict the types of services we are permitted to issue or result in additional tax or other costs that reduces our revenues and earnings. Our inability to receive or renew the necessary licenses, approvals and registrations in a timely manner or at all may lead to interruption of our Company’s operations*

The staffing services sector is subject to complex laws and regulations. These laws and regulations cover the following such as Minimum Wages Act, ESI Act, CLRA Act and EPF Act, which vary from state to state in India and are subject to change. These laws and regulations sometimes limit the size and growth of staffing services markets. Changes in laws or government regulations may result in prohibition or restriction of certain types of services we are permitted to issue, or the imposition of new or additional licensing or tax requirements that could reduce our revenues and earnings. There can be no assurance that we will be able to increase the fees charged to our clients in a timely manner and by a sufficient amount to cover increased costs as a result of any changes in laws or government regulations. Any future changes in laws or government regulations, including changes in tax laws and rates of taxation, may make it more onerous for us to provide staffing services and could have a material adverse effect on our business, financial condition and results of operations. Further, labour laws in India are complex and subject to sporadic change, and non-compliance with any requirements thereunder may result in penalties, loss of business and damage to our reputation. In particular, a large portion of our Associate Employee base is unskilled or semi-skilled workers whose wages are at or slightly above the prescribed minimum wage levels. In the event that regional minimum wage levels are increased by relevant Governmental authorities and we are not immediately made aware of these changes, there could be short periods of time when we could be technically noncompliant with minimum wage rules and regulations, until our clients absorb the increase in wages.

Further, fresh and renewal applications for approvals, licenses, registrations and permissions for operating our business need to be made within certain timeframes. Further, in future we will be required to apply for the renewal of approvals and permits for our business operations to continue. If we are unable to make applications and renew or obtain necessary permits, licenses and approvals on acceptable terms, in a timely manner or at all, we may be required to shut down or relocate our offices or warehouses and face other consequences due to which our business operations may be adversely affected.

For further details on the laws and regulations applicable to us, please refer to the section “Key Industrial Regulations and Policies” beginning on page 131. These effects may occur notwithstanding the assurance over key risks that our internal processes to identify risks, allocate risk owners and monitor actions provide.

5. *We may fail to attract and retain sufficiently trained employees to support our operations, as competition for qualified personnel is intense and we experience significant employee turnover rates.*

Our Company is highly manpower intensive and our success depends to a significant extent on our ability to attract, hire, train and retain qualified employee's ability to attract employees with needed skills in the business we operate. The industry, including our Company, experiences high employee turnover. The employee attrition rate during the last three financial years, i.e., 2023, 2022, and 2021, was 7.26%, 7.62%, and 6.64% respectively. There is a significant competition for professionals in India with skills necessary to perform the services we offer to our clients. Increased competition for these professionals, in the staffing industry or otherwise, could have an adverse effect on us. High attrition rates among our skilled and semi-skilled employees, in particular, could result in a loss of domain and process knowledge, which could result in poor service quality and lead to breaches of our contractual obligations. High turnover rates increases our expenditures due to higher recruitment, training and retention costs and therefore impacts our profit margins. Lack of sufficiently qualified personnel could also inhibit our ability to establish operations in new markets and our efforts to expand geographically. Our failure either to attract, train and retain personnel with the qualifications necessary to fulfil the needs of our existing and future clients or to assimilate new employees successfully could have a material adverse effect on our business, results of operations, financial condition and cash flows.

6. *Company has not made provision for gratuity as per AS 15 – Employee Benefits issued by ICAI in its books relating to certain employees of the Company given the contractual arrangement with client for providing Gratuity reimbursement along with Employee Compensation*

The Company has followed a specific policy regarding the provision for gratuity in its financial statements for the fiscal years 2020, 2021, and 2022 and for the period ended December 31, 2022. As per this policy, the Company has determined that it is not required to create a provision for gratuity in accordance with AS 15 – Employee Benefits issued by the Institute of Chartered Accountants of India (ICAI) wherein the cost of gratuity is being reimbursed by the client.

This policy is based on the contractual arrangement with one of our clients, wherein the client has undertaken the responsibility to make the outstanding gratuity payments for certain employees deployed by the Company at their premises. The agreement specifies that the client will fulfill their obligation to pay the gratuity amount in compliance with the Gratuity Act, and subsequently, the Company will distribute the gratuity funds to the respective employees.

However, it is important to acknowledge that any failure by the client to fulfill their obligation to pay gratuity (when its due) on time or the mandated amount could potentially have a negative impact on the Company's financial position, results of operations, and reputation. The Company remains attentive to these risks and endeavors to address any issues that may arise in relation to the fulfillment of gratuity obligations by the client.

7. *Our company has not consolidated the financial statement of our associate Company for certain years*

Our company has not consolidated the financial statements of our associate company for the financial years 2019, 2020, 2021, and 2022. This decision was based on the fact that the company's share in the associate's financial results, as well as the networth of the associates, were insignificant compared to the company's size. The impact of the consolidation on our company's financials was only ₹1.00 Lakh on a year-on-year basis, which was considered insignificant/ not material. However, we have duly taken into account the consolidation of the associate in the restated consolidated financial statements, please refer chapter titled "Restated Financial Statements" beginning on Page 166.

8. *Our Company has availed moratorium facility from certain banks/ financial institution during the Covid-19 Period.*

In view of the extension of the lockdown and continuing disruptions on account of COVID-19, the Reserve Bank of India (RBI) provided a moratorium period on loan repayments to provide relief to borrowers facing financial difficulties. Initially, the RBI decided to permit the lending institutions to extend the moratorium on term loan for three months, from March 1, 2020, to May 31, 2020. Further, RBI extended the moratorium on term loan instalments by another three months, i.e., from June 1, 2020 to August 31, 2020.

Since the company could not generate enough revenue to service its debt, it availed moratorium facility from certain banks/ financial institutions during the COVID-19 period. The said moratorium facility was availed to move the routine business operations of the Company steadily.

As a result, there is a possibility that the company's creditworthiness may be negatively perceived by other lenders, which could have consequences for future borrowing opportunities. A negative perception of the company's creditworthiness resulting from the moratorium availment could lead to higher borrowing costs in the future. Lenders may view the moratorium as an indication of financial stress or liquidity challenges, causing them to impose stricter lending terms or charge higher interest rates to compensate for perceived risks. This could increase the company's cost of borrowing and potentially impact its financial performance.

9. *Due to the nature of the staffing services business, we may be exposed to employee-related risks, claims and losses that could have an adverse effect on our business and reputation.*

As a staffing services company, the operations of our Company dependent on its employees. We assign our employees to the workplace of our clients. The nature of the business involves managing a large workforce and providing staffing resources to clients. If any of our employee do not perform in accordance with the agreement, instructions or standards established by the clients or agreed by us, our reputation and ability to maintain or expand our client base may be adversely affected. Our ability to control the performance of our employees may be limited. The risks associated with the deployment of our employees, inter-alia, include possible claims relating to:

- actions or inactions of our employees, including matters for which we may have to indemnify our clients;
- failure of our employees to adequately perform their duties including rendering deficient services, , absenteeism or deficiency in reporting timelines;
- criminal acts, torts or other negligent acts by our employees;
- discrimination and harassment claims for physical or sexual abuse (including claims relating to actions of our clients);

In addition, these claims may give rise to litigation, which could be time-consuming and may incur significant costs.

10. Our offices are located on leased premises and there can be no assurance that these leases will be renewed upon termination or that we will be able to obtain other premises on lease on same or similar commercial terms.

Most of the offices from which we operate are out of leased premises. There can be no assurance that we will be able to retain or renew such leases on same or similar terms, or that we will find alternate locations for the existing offices on terms favourable s, or at all. While we renew these lease agreements and service agreements periodically in the ordinary course of business, in the event that these existing leases are terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our operations. If alternative premises are not available at the same or similar costs, sizes or locations, our business, financial condition, cash flows and results of operations may be adversely affected. In addition, any regulatory non-compliance by the landlords or adverse development relating to the landlords' title or ownership rights to such properties, including as a result of any non-compliance by the landlords, may entail significant disruptions to our operations, especially if we are forced to vacate leased spaces following any such developments, and expose us to financial and reputational risks.

Our company on December 27, 2022 received a demand notice from the Income Tax Department for the assessment year 2020-21, amounting to Rs. 20.26 lakhs. As per the applicable provisions of the Income Tax Act, 1961 and as advised the company has made an appeal to the income tax department against the said demand notice. However, the Company has not made any provisions for contingent liabilities in its books. In the event that the income tax authorities do not uphold our appeal, the company will be obliged to make the payment, thereby leading to an increase in our expenses.

13. ***Our Company has filed certain forms with the Registrar of Companies, Maharashtra, Mumbai (ROC) beyond the statutory time period and in respect of certain transactions Company has not filed the forms with the ROC. If the ROC impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.***

In the past, there have been some instances of delays in filing of certain statutory forms with the Registrar of Companies, Maharashtra at Mumbai (“RoC”), which have been subsequently filed along with the additional fees, as per the applicable provisions of the Companies Act, 2013. Further, our Company has not filed the form MGT-14 in respect of resolution passed by the members for grant of loan to the Companies in which directors are interested. Further, Company is not able to file certain forms with the ROC including form relating initial Public issue of the Company to due to technical glitches with MCA- 21 V3 portal.

Further till date, there has been no penalty levied on the Company for such delays/defaults / non filing. However, it cannot be assured that in future no such penalty will be levied on the Company or Directors /officers. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company or its Directors / Officers in relation to the same, our business, financial condition and results of operations could be adversely affected.

The matter is currently pending with the stamp office for adjudication.

15. If our existing clients do not renew their agreements with us, or expand the scope of services we provide to them, or if our long-term relationships with some of our largest clients are impaired or terminated, our revenue could decline, and our results of operations would be adversely impacted.

We derive a significant portion of our revenue from existing clients, and increasing the scope and type of service we provide to our existing clients is a major part of our growth strategy. Revenue from operations from our top five enterprise customers together represented 90%, 91% and 89% of our revenue from operations in the Fiscals 2023, 2022 and 2021, respectively. None of our top enterprise customers include any related parties.

Our clients typically have no obligation to renew or expand their agreements with us after the terms of their existing engagements or arrangements have expired. If one or more of our clients terminate their agreements with us, whether for convenience, for default in the event of a breach by us, or for other reasons specified therein, as applicable, our business and results of operations could be adversely affected. This adverse impact would be even more pronounced for clients that represent a material portion of our revenue or business operations respectively.

While long term relationships with our large clients have not been impaired, and no such agreement has been terminated nor have we faced instances where the existing clients did not renew their agreements or did not expand the scope of service provided to them, we believe our ability to renew or expand our client relationships may decrease or vary as a result of a number of factors, including our clients' satisfaction or dissatisfaction with our services, reliability of our digital solutions, our pricing, the effects of general economic conditions, competitive offerings or alternatives, or reductions in our clients' spending levels. If our clients do not renew or expand their agreements with us or if they renew for shorter lengths or on other terms less favourable to us, our revenue may grow more slowly than expected or decline, and our business could suffer. Our business, financial condition, and results of operations would also be adversely affected if we face difficulty collecting our accounts receivable from our clients. In addition, our clients' decisions to expand the scope of services we offer to them depends on a number of factors, including general economic conditions, quality and accuracy of our solutions, our ability to assist our clients in appropriately identifying challenges faced, mapping out a feasible framework, achieving success with data driven initiatives, and our clients' satisfaction with our solutions. If our efforts to expand within our existing client base are not successful, our business, results of operations and financial condition may be adversely impacted.

16. Our Company has entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.

Our Company have entered into certain related party transactions with our Promoter, Director and body corporates in which our director are interested. For details, please see "Statement of Related Party Disclosures of Restated Financial Statements" under the chapter titled "Restated Financial Statements" beginning on page 166 of this Draft Prospectus. While our Company believes that all such transactions have been conducted on the arm's length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions been entered into with unrelated parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest. In terms of the Companies Act, 2013 and SEBI LODR Regulations, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain related party transactions and to provide requisite undertakings that such related party transactions shall not be done against the interests of the Company and its shareholders. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

17. Certain relevant copies of educational qualification and experience certificates of our Promoter/ Director are not traceable.

Relevant copies of education qualification of Mr. Shailesh Kumar Damani, our Promoter/Director are not traceable. We can't assure you that back-ups for the relevant copies of educational qualifications certificates will be available in a timely manner or at all. We have relied on personal undertakings provided by him.

18. *We have not received “No Objection certificate” (NOC) from some of the lenders of secured and unsecured loans to our company.*

Our company has made applications for No Objection Certificates (NOCs) from both secured and unsecured lenders. However, as of the date of this Draft Prospectus, we have not received the NOCs from a 2 of those lenders. The granting of NOCs by all our lenders for the proposed issue cannot be assured. In the event that we do not receive the necessary NOCs, certain lenders may raise objections to the public issue, imposing conditions to secure their outstanding dues or demanding repayment subsequent to or during the public issue process. This may lead to potential litigation, adversely affecting our financial cash flows and overall performance. Although we do not currently foresee any objections from our lenders, we cannot provide absolute assurance that such objections will not arise.

19. *Our registered office from where our operations are carried out is shared between our Company with our subsidiary Company and Group Companies.*

Our Registered Office situated at Santosh A. Mishra Compound, Mograpada, Mogra Village, off. Old Nagardas Road, Andheri (East), Mumbai, Maharashtra - 400069 India is shared with our group Companies including our subsidiary company. Any dispute arising in future between our subsidiary company and our group companies, consequences to which we may have to change our registered office and place of operations. Also the change in registered office will affect our business operations.

For further details regarding ownership of our registered office, please refer chapter titled “Our Business” beginning on Page 118 of this Draft Prospectus.

20. *Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.*

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense and key personnel are at-will employees and may terminate their employment relationship with us at any time. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

For further details of our Promoters and Management, please refer chapter titled “Our Management” and “Our Promoters and Promoter Group” beginning on Page 146 & 161 of this Draft Prospectus.

21. *Our Promoters and Executive Directors hold Equity Shares in our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

Our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters

may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders.

For further information on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see “Our Management” and “Our Promoters and Promoter Group” on pages 144 and 161 respectively of this Draft Prospectus.

22. Our insurance coverage may not adequately protect us against potential risk and this may have a material adverse effect on our business.

We have obtained a number of insurance policies in connection with our operations including group health insurance, mediclaim policy, fire, Burglary Insurance, Comprehensive General Liability and Professional Protect Insurance. While we believe that the amount of our insurance coverage is in line with industry standards, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. In addition, not all risks associated with our operations may be insurable, on commercially reasonable terms or at all. As of March 31, 2022, 2021 and 2020, the aggregate coverage of the insurance policies obtained by us was ₹2,367.00 lakhs, ₹ 2,378.00 lakhs and ₹ 911.00 lakhs which constituted 192.67%, 189.62% and 68.80% of our non-current assets excluding deferred tax assets (net), respectively.

Although we believe that we have obtained insurance coverage customary to our business, such insurance may not provide adequate coverage in certain circumstances and is subject to certain deductibles, exclusions and limits on coverage. To the extent that we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected. Natural disasters in the future or occurrence of any other event for which we are not adequately or sufficiently insured may cause significant disruption to our operations that could have a material adverse impact on our business and operations. The occurrence of an event for which we are not adequately or sufficiently insured could have an adverse effect on our business, results of operations, financial condition and cash flows. If we are subject to litigation or claims or our operations are interrupted for a sustained period, we cannot assure you that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption.

23. The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.

The company’s operating results may fluctuate or adversely vary in the future from past performances due to a number of factors, many of which are beyond the company’s control. The results of operations during any financial year or from period to period may differ from one another or from the expected results of operations. Its business, results of operations and financial condition may be adversely affected by, inter alia, a decrease in the growth and demand for the products and services offered by us or any strategic alliances which may subsequently become a liability or non-profitable. Due to various reasons including the above, the future performance may fluctuate or adversely vary from our past performances and may not be predictable.

For further details of our operating results, section titled “Financial Information” beginning on Page 166 of this Draft Prospectus

24. Our Company’s management will have flexibility in utilizing the Net Proceeds from the Issue. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.

We propose to utilize the Net Proceeds to meet the working capital requirements of the Company, purchase Laptops and Accessories for IT Development, make repayment and/or prepayment, in part or in full, of certain outstanding loans of our Company, and for general corporate purposes as described in “Objects of the Issue” on page 83 of this Draft Prospectus. The allocation of the net proceeds of the issue will be viz. 23.39% for working

capital requirements, 2.43% for the purchase of Laptops and Accessories for IT Development, 24.28% for loan repayment and/or prepayment, and 24.00% for general corporate purposes. This information is described in the “Objects of the Issue” section on page 83 of this Draft Prospectus. As per the SEBI (ICDR) Regulations, since the Issue size is not in excess of ₹10,000 lakhs, we are not required to appoint a monitoring agency. Therefore, the management of our Company will have discretion in using the Net Proceeds from the Issue, and investors will rely on the judgment of our Company's management regarding the allocation of the Net Proceeds.

At this juncture, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders of our Company may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity.

In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

25. A Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute 24% of the Issue Proceed. As on date we have not identified the use of such funds.

A Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute 24% of the Issue Proceed. We have not identified the general corporate purposes for which these funds may be utilized. The deployment of such funds is entirely at the discretion of our management in accordance with policies established by our Board of Directors from time to time and subject to compliance with the necessary provisions of the Companies Act. Due to the lack of identified purposes, the utilization of these funds involves inherent uncertainties. Our management will consider various factors, including market conditions, business requirements, and strategic goals, to make decisions regarding their utilization. However, unforeseen challenges, changes in market dynamics, or other factors may impact the effectiveness of deploying these funds. While we aim to make informed decisions regarding the utilization of these funds, there is no assurance that their allocation for general purposes will yield effective results for the company.

For details, please refer the chapter titled “Objects of the Issue” beginning on Page No. 83 of this Draft Prospectus.

26. We have not paid any dividends in the past Financial Years. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

Our ability to generate returns for Shareholders is dependent on a host of factors that impact our business and financial condition. Our Company has not paid any dividend on its Equity Shares in the past Financial Years. The

amount of future dividend payments, if any, will depend upon a number of factors, such as our future earnings, financial condition, cash flows, working capital requirements, contractual obligations, applicable Indian legal restrictions, capital expenditures and cost of indebtedness.

In addition, our ability to pay dividends may be impacted by a number of factors, including restrictive covenants under the loan or financing agreements our Company may enter into. Even in years in which we may have profits, we may decide to retain all of our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. Therefore, there can be no assurance that we will be able to pay dividends in the future. For further details, see section “Dividend Policy” on page 165 of this Draft Prospectus.

27. We will continue to be controlled by our Promoter and Promoter Group after the completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.

As on the date of this Draft Prospectus, our Promoter and Promoter Group hold 89.51% of the issued and outstanding paid-up share capital of our Company. Following the completion of the Issue, our Promoter and Promoter Group will continue to hold together 62.64% of our post-Issue Equity Share capital. As a result, they will have the ability to influence matters requiring shareholders’ approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders’ meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions. We cannot assure you that our Promoters and Promoter Group will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

For further details regarding our shareholding, please refer to chapter titled “Capital Structure” beginning on Page 62 of this Draft Prospectus.

28. We may need to seek additional financing in the future to support our growth strategies. Any failure to raise additional financing could have an adverse effect on our business, results of operations, financial condition and cash flows.

Our strategy to grow our business may require us to raise additional funds for our working capital or long-term business plans. While we have historically funded our capital expenditure primarily through internal accruals and cash flow from operations, we cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. If our internally generated capital resources and available credit facilities are insufficient to finance our capital expenditure and growth plans, we may, in the future, have to seek additional financing from third parties, including banks, venture capital funds, joint-venture partners and other strategic investors. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. Our financing agreements may contain terms and conditions that may restrict our ability to operate and manage our business, such as terms and conditions that require us to maintain certain pre-set debt service coverage ratios and leverage ratios and require us to use our assets, including our cash balances, as collateral for our indebtedness. If we are unable to obtain such financing in a timely manner, at a reasonable cost and on acceptable terms or at all, we may be forced to delay our expansion plans, downsize or abandon such plans, which may materially and adversely affect our business, financial condition and results of operations, as well as our future prospects.

29. *If we do not set optimal prices for our service offerings, our business, financial condition, and results of operations could be adversely affected.*

We generally quote prices for our service offerings on a case-to-case basis, depending upon the specific requirement of our customers, or the length of the commitment of our services. Since, we do not have a standard price set for our services, we may have to adjust our prices either for individual customers in connection with long-term agreements or for a particular offering. Further, as competitors introduce new products that compete with ours or reduce their prices, we may be unable to attract new customers or retain existing customers based on our historical pricing. While we have not faced any such instances in the past, we believe as we expand and source new clients, we also must determine the appropriate price to enable us to compete effectively. In addition, if our mix of offerings changes, then we may need to, or choose to, revise our pricing model. If we do not optimally price our service offerings and manage risks related to changing our prices or pricing model, our business, financial condition, and results of operations could be adversely affected.

30. *If we are unable to attract new customers, retain customers at existing levels or sell additional services to our existing customers, our revenue growth will be adversely affected.*

To continue to grow our business, it is important that we continue to acquire new customers. Our success in adding new customers depends on numerous factors, including our ability to (1) offer a compelling and effective service offerings, (2) execute our sales and marketing strategy, (3) attract, effectively train, and retain new sales, marketing, professional services, and support personnel, (4) expand into new geographies and vertical markets, (5) deploy our offerings for new customers, (6) provide quality customer support once deployed, (7) effectively manage and forecast our customer count, and (8) expand our use cases for our existing customers

It is important to our continued growth that we retain our existing customers. Our customers have no obligation to renew our services at the same prices and terms. While we have not faced instances in the past, where the existing clients did not renew their agreements, our customer retention or our customers' use of our services may decline or fluctuate as a result of a number of factors, including our customers' satisfaction with our offerings, our prices and pricing plans, reductions in our customers' spending levels etc. If we are unable to successfully acquire new customers, retain our existing customers, or expand sales to existing customers, our business, financial condition, and results of operations could be adversely affected

31. *Our Company proposes to utilize part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain borrowings availed by our Company from various Banks and NBFCs, accordingly, the utilization of that portion of the Net Proceeds will not result in creation of any tangible assets.*

Our Company proposes to utilize part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain borrowings availed by our Company instead of investing in tangible assets this may be presumed that our company have limited opportunities for capital deployment and growth prospects. This may impact our ability to pursue growth initiatives, research and development, strategic acquisitions, or other value-enhancing projects, client acquisition. The decision to utilize funds for debt repayment without creating tangible assets should consider the opportunity cost. If alternative investment opportunities with higher potential returns are foregone, it may impact our long-term financial performance and shareholder value creation. In the future, our company may need to rely on external financing to fund capital-intensive projects or operational requirements if funds are allocated primarily towards debt repayment. This dependency on external financing may introduce additional risks, such as higher borrowing costs, stricter lending terms, or limited availability of funds.

32. *Our funding requirements and proposed deployment of the Net Proceeds have not been appraised by a bank or a financial institution and if there are any delays or cost overruns, we may have to incur additional cost to fund the objects of the Issue because of which our business, financial condition and results of operations may be adversely affected*

We intend to use the Net Proceeds for the purposes described in the “Objects of the Issue” on page 83. The funding requirements mentioned as a part of the objects of the Issue have not been appraised by any bank or financial institution. The proposed utilisation of the Net Proceeds is based on current conditions, internal management estimates, estimates received from the third party agencies and are subject to changes in the external circumstances or costs, or in other financial condition, business or strategy as discussed further below.

Based on the nature of our industry, we may have to revise our business plan and / or management estimate from time to time and consequently our funding requirements may also change. Our internal management estimates may exceed fair market value or the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our capital expenditure and may have an adverse impact on our business, financial condition, results of operations and cash flows. Further, pending utilisation of Net Proceeds towards the Objects, our Company will have the flexibility to deploy the Net Proceeds and to deposit the Net Proceeds temporarily in deposits with one or more scheduled commercial banks included in the Second Schedule of the Reserve Bank of India Act, 1939. Accordingly, prospective investors in the Issue will need to rely on our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilisation of the Net Proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the Net Proceeds and our business and financial results may suffer.

33. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “Objects of the Issue” on page 83 of this Draft Prospectus.

EXTERNAL RISK

34. Natural disasters, epidemics, pandemics, acts of war, terrorist attacks and other events could materially and adversely affect our business

Natural disasters (such as earthquakes, fire, typhoons, cyclones, hurricanes and floods), pandemics, epidemics, strikes, civil unrest, terrorist attacks and other events, which are beyond our control, may lead to global or regional economic instability, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations. Any of these occurrences could cause severe disruptions to our daily operations and may warrant a temporary closure of our facilities. Such closures may disrupt our business operations and adversely affect our results of operations. Our operation could also be disrupted if our customers or business partners are affected by such natural disasters or epidemics.

An outbreak or epidemic, such as SARS, the H1N1 and H5N1 viruses or COVID-19 could cause general consumption or the demand for various products to decline, which could result in reduced demand for our services. Such an outbreak or epidemic may significantly interrupt our business operations as health or governmental authorities may impose quarantine and inspection measures on us or our contractors, or restrict the flow of cargo to and from areas affected by the outbreak or epidemic.

Furthermore, certain regions in India have witnessed terrorist attacks and civil disturbances and it is possible that future terrorist attacks or civil unrest, as well as other adverse social, economic and political events in India could have a negative effect on us. Transportation facilities, including vehicles, can be targets of terrorist attacks, which could lead to, among other things, increased insurance and security costs. Regional and global political or military tensions or conflicts, strained or altered foreign relations, protectionism and acts of war or the potential for war could also cause damage and disruption to our business, which could materially and adversely affect our business, financial condition, cash flows and results of operations. Such incidents could create the perception that investments in Indian companies involve a higher degree of risk and such perception could adversely affect our business and the price of the Equity Shares. We may also face difficulty in accessing certain parts of India at certain times of the year or under adverse or inclement weather conditions

35. Financial instability in other countries may cause increased volatility in Indian and other financial markets.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections. These could include greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

36. Changing laws, rules and regulations and legal uncertainties in India and other countries may adversely affect our business and financial performance

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably

respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“GST”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR which have come into effect from April 1, 2017.

37. Our business is affected by economic, political and other prevailing conditions beyond our control

We are incorporated in India and we conduct our corporate affairs and our business in India. Our Equity Shares are proposed to be listed on NSE. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India’s various neighboring countries;
- hostile or war like situations with the neighboring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges;
- decline in India’s foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India’s sovereign debt rating by rating agencies; and
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

38. Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.

Our Company currently prepares its annual financial statements under Indian GAAP. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company may require to prepare its financial statements in accordance with Ind AS in future. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the restated financial statements included in the Draft Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the Draft Prospectus should accordingly be limited.

39. *The requirements of being a publicly-listed company may strain our resources*

We are not a publicly-listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the Listing Regulations which will require us to file audited annual and unaudited half yearly / quarterly reports, as the case may be with respect to our business and financial condition. We may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations, and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

40. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Prospectus.*

While facts and other statistics in the Draft Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "Industry Overview" beginning on page 105 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

41. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

RISK RELATED TO EQUITY SHARES AND THIS ISSUE

42. In the last 12 months our Equity Shares were issued and transferred at a price that may be at lower than the Issue Price.

In the last 12 months we had issued fresh Equity Shares to the promoters and other shareholders of our Company, and one of our promoter has transferred the Equity Shares of the Company, at a price lower than the Issue Price, details of the same are as follows:

- Bonus issue in the ratio of 2:1 dated April 12, 2023 issuing 40,00,000 Equity shares face value ₹10/- per Equity Share for consideration other than cash.
- Transfer of 6,00,000 and 29,534 Equity shares having face value ₹10/- per Equity Share from Mr. Shailesh Kumar Damani, Promoter and Managing Director of our Company to Mr. Mahesh Ahuja and Mr. Abhishek Jani, respectively, for cash consideration of ₹11.50/- per Equity Share on June 21, 2023.

The Equity Shares allotted to investors pursuant to this Issue is being priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time.

For Further details of equity shares issued, please refer to the chapter titled “Capital Structure” beginning on page 62 of the Prospectus.

43. The average cost of acquisition of Equity Shares by our Promoters is lower than the Issue Price.

Our Promoters average cost of acquisition of Equity Shares in our Company is lower than the Issue Price decided by the Company in consultation with the Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapters “Capital Structure” beginning on page 62 of this Draft Prospectus.

44. The trading volume and market price of the Equity Shares may be volatile following the Issue.

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- semi-annual variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts’ recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

45. The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and the investors may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the stock exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market

for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India and volatility in the Stock Exchanges and securities markets elsewhere in the world.

46. Investors may be subject to Indian taxes arising out of income arising on the sale of the Equity Share

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realised on the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any capital gains realised on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short-term capital gains tax in India.

47. There is no guarantee that our Equity Shares will be listed on the stock exchanges in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the stock exchanges within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

48. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.

The Equity Shares will be listed on the EMERGE Platform of National Stock Exchange of India Limited. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors’ book entry, or ‘demat’ accounts with depository participants in India, are expected to be credited with the Equity Shares within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in this Issue and the credit of such Equity Shares to the applicant’s demat account with depository participant could take approximately six Working Days from the Bid Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within six Working Days of the Bid Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise any delay in commencing trading in the Equity Shares would restrict investors’ ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors’ demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods

49. Any future issuance of Equity Shares, or convertible securities or other equity linked instruments by us may dilute your shareholding and sale of Equity Shares by shareholders with significant shareholding may adversely affect the trading price of the Equity Shares

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. There can be no assurance that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

50. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue. Further, the current market price of some securities listed pursuant to certain previous issues managed by the LM is below their respective Issue prices.

The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue. The Issue Price of the Equity Shares was determined by our Company in consultation with Lead Manager. This price is based on numerous factors, as described under "Basis for Issue Price" on page 93 and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to resell their Equity Shares at or above the Issue Price.

In addition to the above, the current market price of securities listed pursuant to certain previous initial public offerings managed by the LM is below their respective Issue price. For further details, see "Other Regulatory and Statutory Disclosures – Statement on Price Information of past Issues handled by Indorient Financial Services Limited" on page 244. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

51. Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, 2013, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution. However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value such custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced.

52. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and

reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities.

In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Non-debt Rules, all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of the Equity Shares is situated in or is a citizen of any such country, can only be made through the Government approval route, as prescribed in the FDI Policy dated October 15, 2020 and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further information, see “Restrictions on Foreign Ownership of Indian Securities” on page 294.

GLOBAL ECONOMIC OVERVIEW

Inflation Peaking amid Low Growth

- Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia’s war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent.
- The balance of risks remains tilted to the downside, but adverse risks have moderated since the October 2022 WEO. On the upside, a stronger boost from pent-up demand in numerous economies or a faster fall in inflation are plausible. On the downside, severe health outcomes in China could hold back the recovery, Russia’s war in Ukraine could escalate, and tighter global financing conditions could worsen debt distress. Financial markets could also suddenly reprice in response to adverse inflation news, while further geopolitical fragmentation could hamper economic progress.
- In most economies, amid the cost-of-living crisis, the priority remains achieving sustained disinflation. With tighter monetary conditions and lower growth potentially affecting financial and debt stability, it is necessary to deploy macroprudential tools and strengthen debt restructuring frameworks. Accelerating COVID-19 vaccinations in China would safeguard the recovery, with positive cross-border spill overs. Fiscal support should be better targeted at those most affected by elevated food and energy prices, and broad-based fiscal relief measures should be withdrawn. Stronger multilateral cooperation is essential to preserve the gains from the rules-based multilateral system and to mitigate climate change by limiting emissions and raising green investment.

Forces shaping the outlook

The global fight against inflation, Russia’s war in Ukraine, and a resurgence of COVID-19 in China weighed on global economic activity in 2022, and the first two factors will continue to do so in 2023.

Despite these headwinds, real GDP was surprisingly strong in the third quarter of 2022 in numerous economies, including the United States, the euro area, and major emerging market and developing economies. The sources of these surprises were in many cases domestic: stronger-than-expected private consumption and investment amid tight labor markets and greater-than-anticipated fiscal support. Households spent more to satisfy pent-up demand, particularly on services, partly by drawing down their stock of savings as economies reopened. Business investment rose to meet demand. On the supply side, easing bottlenecks and declining transportation costs reduced pressures on input prices and allowed for a rebound in previously constrained sectors, such as motor vehicles. Energy markets have adjusted faster than expected to the shock from Russia’s invasion of Ukraine.

In the fourth quarter of 2022, however, this uptick is estimated to have faded in most—though not all—major economies. US growth remains stronger than expected, with consumers continuing to spend from their stock of savings (the personal saving rate is at its lowest in more than 60 years, except for July 2005), unemployment near historic lows, and plentiful job opportunities. But elsewhere, high-frequency activity indicators (such as business and consumer sentiment, purchasing manager surveys, and mobility indicators) generally point to a slowdown.

COVID-19 deepens China’s slowdown - Economic activity in China slowed in the fourth quarter amid multiple large COVID-19 outbreaks in Beijing and other densely populated localities. Renewed lockdowns accompanied the outbreaks until the relaxation of COVID-19 restrictions in November and December, which paved the way for a full reopening. Real estate investment continued to contract, and developer restructuring is proceeding slowly, amid the lingering property market crisis. Developers have yet to deliver on a large backlog of presold housing, and downward pressure is building on house prices (so far limited by home price floors). The authorities have responded with additional monetary and fiscal policy easing, new vaccination targets for the elderly, and steps to support the completion of unfinished real estate projects. However, consumer and business sentiment remained subdued in late 2022. China’s slowdown has reduced global trade growth and international commodity prices.

Monetary policy starts to bite - Signs are apparent that monetary policy tightening is starting to cool demand and inflation, but the full impact is unlikely to be realized before 2024. Global headline inflation appears to have peaked in the third quarter of 2022 (Figure 1). Prices of fuel and nonfuel commodities have declined, lowering headline inflation, notably in the United States, the euro area, and Latin America. But underlying (core) inflation has not yet peaked in most economies and remains well above pre-pandemic levels. It has persisted amid second-round effects from earlier cost shocks and tight labor markets with robust wage growth as consumer demand has remained resilient. Medium-term inflation expectations generally remain anchored, but some gauges are up. These developments have caused central banks to raise rates faster than expected, especially in the United States and the euro area, and to signal that rates will stay elevated for longer. Core inflation is declining in some economies that have completed their tightening cycle—such as Brazil. Financial markets are displaying high sensitivity to inflation news, with equity markets rising following recent releases of lower inflation data in anticipation of interest rate cuts (Box 1), despite central banks’ communicating their resolve to tighten policy further. With the peak in US headline inflation and an acceleration in rate hikes by several non-US central banks, the dollar has weakened since September but remains significantly stronger than a year ago.

Winter comes to Europe - European economic growth in 2022 was more resilient than expected in the face of the large negative terms-of-trade shock from the war in Ukraine. This resilience—which is visible in consumption and investment data for the third quarter—partly reflects government support of about 1.2 percent of European Union GDP (net budgetary cost) to households and firms hit by the energy crisis, as well as dynamism from economies reopening. Gas prices have declined by more than expected amid higher non-Russian pipeline and liquefied natural gas flows, compression of demand for gas, and a warmer-than-usual winter. However, the boost from reopening appears to be fading. High-frequency indicators for the fourth quarter suggest that the manufacturing and services sectors are contracting. Consumer confidence and business sentiment have worsened. With inflation at about 10 percent or above in several euro area countries and the United Kingdom, household budgets remain stretched. The accelerated pace of rate increases by the Bank of England and the European Central Bank is tightening financial conditions and cooling demand in the housing sector and beyond.

The Forecast

Growth Bottoming Out

Global growth, estimated at 3.4 percent in 2022, is projected to fall to 2.9 percent in 2023 before rising to 3.1 percent in 2024 (Table 1). Compared with the October forecast, the estimate for 2022 and the forecast for 2023 are both higher by about 0.2 percentage point, reflecting positive surprises and greater-than-expected resilience in

numerous economies. Negative growth in global GDP or global GDP per capita—which often happens when there is a global recession—is not expected. Nevertheless, global growth projected for 2023 and 2024 is below the historical (2000–19) annual average of 3.8 percent. The forecast of low growth in 2023 reflects the rise in central bank rates to fight inflation—especially in advanced economies—as well as the war in Ukraine. The decline in growth in 2023 from 2022 is driven by advanced economies; in emerging market and developing economies, growth is estimated to have bottomed out in 2022. Growth is expected to pick up in China with the full reopening in 2023. The expected pickup in 2024 in both groups of economies reflects gradual recovery from the effects of the war in Ukraine and subsiding inflation. Following the path of global demand, world trade growth is expected to decline in 2023 to 2.4 percent, despite an easing of supply bottlenecks, before rising to 3.4 percent in 2024. These forecasts are based on a number of assumptions, including on fuel and nonfuel commodity prices, which have generally been revised down since October, and on interest rates, which have been revised up. In 2023, oil prices are projected to fall by about 16 percent, while nonfuel commodity prices are expected to fall by, on average, 6.3 percent. Global interest rate assumptions are revised up, reflecting intensified actual and signalled policy tightening by major central banks since October.

Inflation Peaking

About 84 percent of countries are expected to have lower headline (consumer price index) inflation in 2023 than in 2022. Global inflation is set to fall from 8.8 percent in 2022 (annual average) to 6.6 percent in 2023 and 4.3 percent in 2024—above pre-pandemic (2017–19) levels of about 3.5 percent. The projected disinflation partly reflects declining international fuel and nonfuel commodity prices due to weaker global demand. It also reflects the cooling effects of monetary policy tightening on underlying (core) inflation, which globally is expected to decline from 6.9 percent in the fourth quarter of 2022 (year over year) to 4.5 percent by the fourth quarter of 2023. Still, disinflation will take time: by 2024, projected annual average headline and core inflation will, respectively, still be above pre-pandemic levels in 82 percent and 86 percent of economies.

In advanced economies, annual average inflation is projected to decline from 7.3 percent in 2022 to 4.6 percent in 2023 and 2.6 percent in 2024—above target in several cases. In emerging market and developing economies, projected annual inflation declines from 9.9 percent in 2022 to 8.1 percent in 2023 and 5.5 percent in 2024, above the 4.9 percent pre-pandemic (2017–19) average. In low-income developing countries, inflation is projected to moderate from 14.2 percent in 2022 to 8.6 percent in 2024—still high, but close to the pre-pandemic average.

Policy Priorities

Securing global disinflation: For most economies, the priority remains achieving a sustained reduction in inflation toward target levels. Raising real policy rates and keeping them above their neutral levels until underlying inflation is clearly declining would ward off risks of inflation expectations deanchoring. Clear central bank communication and appropriate reactions to shifts in the data will help keep inflation expectations anchored and lessen wage and price pressures. Central banks' balance sheets will need to be unwound carefully, amid market liquidity risks. Gradual and steady fiscal tightening would contribute to cooling demand and limit the burden on monetary policy in the fight against inflation. In countries where output remains below potential and inflation is in check, maintaining monetary and fiscal accommodation may be appropriate.

Containing the reemergence of COVID-19: Addressing the ongoing pandemic requires coordinated efforts to boost vaccination and medicine access in countries where coverage remains low as well as the deployment of pandemic preparedness measures—including a global push toward sequencing and sharing data. In China, focusing vaccination efforts on vulnerable groups and maintaining sufficiently high coverage of boosters and antiviral medicines would minimize the risks of severe health outcomes and safeguard the recovery, with favorable cross-border spillovers.

Ensuring financial stability: Depending on country circumstances, macroprudential tools can be used to tackle pockets of elevated financial sector vulnerabilities. Monitoring housing sector developments and conducting stress tests in economies where house prices have increased significantly over the past few years are warranted. In China, central government action to resolve the property crisis and reduce the risk of spillovers to financial stability and growth is a priority, including by strengthening temporary mechanisms to protect presale homebuyers from the risk of non-delivery and by restructuring troubled developers. Globally, financial sector regulations introduced after the global financial crisis have contributed to the resilience of banking sectors throughout the pandemic, but there is a need to address data and supervisory gaps in the less-regulated nonbank financial sector, where risks may have built up inconspicuously. Recent turmoil in the crypto space also highlights the urgent need to introduce common standards and reinforce oversight of crypto assets.

Restoring debt sustainability: Lower growth and higher borrowing costs have raised public debt ratios in several economies. Where debt is unsustainable, implementing restructuring or reprofiling early on as part of a package of reforms (including fiscal consolidation and growth-enhancing supply-side reforms) can avert the need for more disruptive adjustment later.

Supporting the vulnerable: The surge in global energy and food prices triggered a cost-of-living crisis. Governments acted swiftly with support to households and firms, which helped cushion effects on growth and at times limited the pass-through from energy prices to headline inflation through price controls. The temporary and broad-based measures are becoming increasingly costly and should be withdrawn and replaced by targeted approaches. Preserving the energy price signal will encourage a reduction in energy consumption and limit the risks of shortages. Targeting can be achieved through social safety nets such as cash transfers to eligible households based on income or demographics or by transfers through electricity companies based on past energy consumption. Subsidies should be temporary and offset by revenue-generating measures, including one-time solidarity taxes on high-income households and companies, where appropriate.

Reinforcing supply: Supply-side policies could address the key structural factors impeding growth— including market power, rent seeking, rigid regulation and planning, and inefficient education—and could help build resilience, reduce bottlenecks, and alleviate price pressures. A concerted push for investment along the supply chain of green energy technologies would bolster energy security and help advance progress on the green transition.

Strengthening multilateral cooperation—Urgent action is needed to limit the risks stemming from geopolitical fragmentation and to ensure cooperation on fundamental areas of common interest:

- **Restraining the pandemic:** Global coordination is needed to resolve bottlenecks in the global distribution of vaccines and treatments. Public support for the development of new vaccine technologies and the design of systematic responses to future epidemics also remains essential.
- **Addressing debt distress:** Progress has been made for countries that requested debt treatment under the Group of Twenty’s Common Framework initiative, and more will be needed to strengthen it. It is also necessary to agree on mechanisms to resolve debt in a broader set of economies, including middle-income countries that are not eligible under the Common Framework. Non– Paris Club and private creditors have a crucial role to play in ensuring coordinated, effective, and timely debt resolution processes.
- **Strengthening global trade:** Strengthening the global trading system would address risks associated with trade fragmentation. This can be achieved by rolling back restrictions on food exports and other essential items such as medicine, upgrading World Trade Organization (WTO) rules in critical areas such as agricultural and industrial subsidies, concluding and implementing new WTO-based agreements, and fully restoring the WTO dispute settlement system.
- **Using the global financial safety net:** With the cascading of shocks to the global economy, using the global financial safety net to its fullest extent is appropriate, including by proactively utilizing the IMF’s precautionary financial arrangements and channeling aid from the international community to low-income countries facing shocks.

- Speeding the green transition: To meet governments' climate change goals, it is necessary to swiftly implement credible mitigation policies. International coordination on carbon pricing or equivalent policies would facilitate faster decarbonization. Global cooperation is needed to build resilience to climate shocks, including through aid to vulnerable countries.

INDIAN ECONOMIC OVERVIEW

In general, global economic shocks in the past were severe but spaced out in time. This changed in the third decade of this millennium. At least three shocks have hit the global economy since 2020. It all started with the pandemic-induced contraction of the global output, followed by the Russian-Ukraine conflict leading to a worldwide surge in inflation. Then, the central banks across economies led by the Federal Reserve responded with synchronised policy rate hikes to curb inflation. The rate hike by the US Fed drove capital into the US markets causing the US Dollar to appreciate against most currencies. This led to the widening of the Current Account Deficits (CAD) and increased inflationary pressures in net importing economies. The rate hike and persistent inflation also led to a lowering of the global growth forecasts for 2022 and 2023 by the IMF in its October 2022 update of the World Economic Outlook. The frailties of the Chinese economy further contributed to weakening the growth forecasts. Slowing global growth apart from monetary tightening may also lead to a financial contagion emanating from the advanced economies where the debt of the non-financial sector has risen the most since the global financial crisis. With inflation persisting in the advanced economies and the central banks hinting at further rate hikes, downside risks to the global economic outlook appear elevated.

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as

global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world's second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year's capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. A much-improved financial health of well-capitalised public sector banks has positioned them better to increase the credit supply. Consequently, the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector has been remarkably high, over 30.6 per cent, on average during Jan-Nov 2022, supported by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) of the Union government. The increase in the overall bank credit has also been influenced by the shift in borrower's funding choices from volatile bond markets, where yields have increased, and external commercial borrowings, where interest and hedging costs have increased, towards banks. If inflation declines in FY24 and if real cost of credit does not rise, then credit growth is likely to be brisk in FY24. India's economic growth in FY23 has been principally led by private consumption and capital formation. It has helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. Still, private capex soon needs to take up the leadership role to put job creation on a fast track. Recovery of MSMEs is proceeding apace, as is evident in the amounts of Goods and Services Tax (GST) they pay, while the Emergency Credit Linked Guarantee Scheme (ECLGS) is easing their debt servicing concerns. The Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) has been directly providing jobs in rural areas and indirectly creating opportunities for rural households to diversify their sources of income generation. Schemes like PM-Kisan and PM Garib Kalyan Yojana have helped in ensuring food security in the country, and their impact was also endorsed by the United Nations Development Programme (UNDP)¹. The results of the National Family Health Survey (NFHS) also show improvement in rural welfare indicators from FY16 to FY20, covering aspects like gender, fertility rate, household amenities, and women empowerment.

Global growth has been projected to decline in 2023 and is expected to remain generally subdued in the following years as well. The slowing demand will likely push down global commodity prices and improve India's CAD in FY24. However, a downside risk to the Current Account Balance stems from a swift recovery driven mainly by domestic demand and, to a lesser extent, by exports. The CAD needs to be closely monitored as the growth momentum of the current year spills over into the next. Growth is expected to be brisk in FY24 as a vigorous credit disbursement, and capital investment cycle is expected to unfold in India with the strengthening of the balance sheets of the corporate and banking sectors. Further support to economic growth will come from the expansion of public digital platforms and path-breaking measures such as PM Gati Shakti, the National Logistics Policy, and the Production-Linked Incentive schemes to boost manufacturing output.

SUMMARY OF THE ECONOMIC SURVEY 2022-23

- Recovering from pandemic-induced contraction, the Russian-Ukraine conflict and inflation, the Indian economy is staging a broad-based recovery across sectors, positioning itself to ascend to the pre-pandemic growth path in FY23.
- India's GDP growth is expected to remain robust in FY24. GDP forecast for FY24 to be in the range of 6-6.8%.
- Private consumption in H1 is the highest since FY15 and this has led to a boost to production activity resulting in enhanced capacity utilisation across sectors.
- The Capital Expenditure of the Central Government and crowding in the private Capex led by the strengthening of the balance sheets of the Corporates is one of the growth drivers of the Indian economy in the current year.
- The credit growth to the MSME sector was over 30.6% on average during Jan-Nov 2022.
- Retail inflation is back within RBI's target range in November 2022.
- Indian Rupee performed well compared to other Emerging Market Economies in Apr-Dec 2022.
- Direct Tax collections for the period April-November 2022 remain buoyant.
- Enhanced Employment generation seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund.
- Economic growth to be boosted by the expansion of public digital platforms and measures to boost manufacturing output.

INDIA'S MEDIUM-TERM GROWTH OUTLOOK

- Indian economy underwent wide-ranging structural and governance reforms that strengthened the economy's fundamentals by enhancing its overall efficiency during 2014-2022.
- With an underlying emphasis on improving the ease of living and doing business, the reforms after 2014 were based on the broad principles of creating public goods, adopting trust-based governance, co-partnering with the private sector for development, and improving agricultural productivity.
- The period of 2014-2022 also witnessed balance sheet stress caused by the credit boom in the previous years and one-off global shocks, that adversely impacted the key macroeconomic variables such as credit growth, capital formation, and hence economic growth during this period.
- This situation is analogous to the period 1998-2002 when transformative reforms undertaken by the government had lagged growth returns due to temporary shocks in the economy. Once these shocks faded, the structural reforms paid growth dividends from 2003.
- Similarly, the Indian economy is well placed to grow faster in the coming decade once the global shocks of the pandemic and the spike in commodity prices in 2022 fade away.
- With improved and healthier balance sheets of the banking, non-banking and corporate sectors, a fresh credit cycle has already begun, evident from the double-digit growth in bank credit over the past months.

- The Indian economy has also started benefiting from the efficiency gains resulting from greater formalisation, higher financial inclusion, and economic opportunities created by digital technology-based economic reforms.
- India's growth outlook seems better than in the pre-pandemic years and the Indian economy is prepared to grow at its potential in the medium term.

a) Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

b) Property, Plant and Equipment

Tangible assets are stated at cost, less accumulated depreciation and impairment (if any). Cost consists of acquisition cost comprising purchase price (excluding rebates and discounts) and direct cost incurred to make the asset ready to use. All assets costing Rs. 5,000 or below are fully depreciated in the year of addition.

Subsequent expenditure related to an item of property plant and equipment is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing fixed assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

Gains or losses arising from derecognition of property plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

c) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the statement of profit and loss in the year in which the expenditure is incurred.

Intangible assets are amortized on a straight-line basis over the estimated useful economic life. All intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern. Such changes are accounted for in accordance with AS 5 Net Profit or Loss for the Period, Prior Period Items & Changes in Accounting Policies.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

d) Depreciation and Amortisation

Depreciation on property, plant and equipment is calculated on a written down value basis using the rates specified in the Schedule II of the Companies Act, 2013.

The estimated useful life of the intangible assets and the amortisation period are reviewed at the end of each financial year and the amortisation method is revised to reflect the changed pattern.

e) Government grants and subsidies

Government grants and subsidies relating to revenue are recognised when there is reasonable assurance that the Company will comply with the conditions attached to them and the grants / subsidy will be received.

f) Leases

Where the Company is lessee

Finance leases, which effectively transfer to the company substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease term at the lower of the fair value of the leased property and present value of minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized as finance costs in the statement of profit and loss. Lease management fees, legal charges and other initial direct costs of lease are capitalized.

A leased asset is depreciated on a straight-line basis over the useful life of the asset. However, if there is no reasonable certainty that the company will obtain the ownership by the end of the lease term, the capitalized asset is depreciated on a straight-line basis over the shorter of the estimated useful life of the asset or the lease term.

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the statement of profit and loss on a straight-line basis over the lease term.

Where the company is lessor

Leases in which the Company does not transfer substantially all the risk and benefit of ownership of assets are classified as operating leases. Assets subject to operating leases are included in property, plant and equipment. Lease income on an operating lease is recognized in the statement of profit and loss on a straight basis over the lease terms. Costs, including depreciation, are recognized as an expense in the statement of profit and loss. Initial direct costs such as legal cost, brokerage costs etc. are recognized immediately in the statement of profit and loss.

g) Borrowing costs

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

h) Cash and cash equivalents

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank and in hand and short-term investments/deposits with an original maturity of three months or less.

i) Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. If an investment is acquired, or partly acquired, by the issue of shares or other securities, the acquisition cost is the fair value of the securities issued. If an investment is acquired in exchange for another asset, the acquisition is determined by reference to the fair value of the asset given up or by reference to the fair value of the investment acquired, whichever is more clearly evident.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

j) Impairment of tangible and intangible assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations, including impairment on inventories, are recognized in the statement of profit and loss, except for previously revalued tangible fixed assets, where the revaluation was taken to revaluation reserve. In this case, the impairment is also recognized in the revaluation reserve up to the amount of any previous revaluation.

After impairment, depreciation / amortisation is provided on the revised carrying amount of the asset over its remaining useful life.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit and loss unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase.

k) Revenue recognition

Revenue from operations are recognised on completion of the project and rendering of services.

Interest income is recognised on the basis of accrual method on the rates applicable to the transaction.

Rent is recognised on the basis of accrual as per the agreement.

Income from investment is accounted for on accrual basis when the right to received income is established.

l) Foreign currency translation

Initial recognition

Foreign currency transactions are recorded in the reporting currency, by applying the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Conversion

Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date. Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency, are reported using the exchange rate at the date of the transaction.

Exchange differences

Exchange differences arising on settlement / conversion of foreign currency monetary assets and liabilities are recognized as income or expense in the Statement of Profit and Loss in the period in which they arise.

m) Retirement and other employee benefits

Employee benefits include provident fund, gratuity and compensated absences. Defined contribution plans

Retirement benefit in the form of provident fund is a defined contribution plan. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service.

Defined benefit plans

For defined benefit plan in the form of gratuity, the cost of providing benefits is determined based on the actuarial valuation using the projected unit credit method at the year-end. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur.

Company assigns its employees to various client locations as part of its operations. In accordance with the terms of our agreements with clients, the responsibility for ensuring compliance with labor laws, regulations, and related statutory requirements for these assigned employees primarily rests with the respective clients. In the event that a client defaults or fails to fulfill the required labor law compliances for their assigned employees, Company may be required to assume responsibility and take necessary actions to ensure compliance on their behalf. This could involve engaging in corrective measures, making financial provisions, or bearing any legal consequences that may arise due to the client's non-compliance.

While Company maintains systems and procedures to monitor and encourage client compliance, it may not have direct control over the actions and decisions made by the clients. Therefore, the possibility of unforeseen contingent liabilities arising from client non-compliance cannot be completely eliminated.

n) Segment reporting

The Company's business activity primarily falls within a single business segment i.e. Business Process Outsourcing (BPO). The Company mainly operates Indian domicile. Hence segment information as per AS 17 is not required to be disclosed.

o) Income taxes

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The Company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

p) Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

q) Provisions and contingent liabilities

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable

estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

22 Contingent liabilities and commitments, as restated (continued)

(a) Income tax liability pertains to demand on account of additions during assessment for AY 2021-22. The group has filed an appeal with Commissioner of Appeals on which is pending appeals at the date of signing of consolidated re-stated financial statements.

b) The Honourable Supreme court gave a judgement dated February 28, 2019 on certain aspects related to Provident Fund. The question before the Supreme Court was whether certain allowances payable to all employees generally or to all employees engaged in a particular category would also fall within the purview of 'basic wages' for the purpose of determining the amount of EPF Contribution payable by the employer.

In reference to the above judgement, the Group is of the view that it is highly unlikely that the judgment of the Supreme Court would call for retrospective application. Further, the Group is also of the view that there are interpretation challenges and considerable uncertainty, including estimating the amount retrospectively.

Consequently, no financial effect has been provided in the financial statements towards any potential retrospective application of the above Supreme court judgement. However, as a matter of abundant caution, the Group has made a provision on a prospective basis and believes that the difference between the provision and the expected liability (if any) is not material.

(c) Group assigns its employees to various client locations as part of its operations. In accordance with the terms of our agreements with clients, the responsibility for ensuring compliance with labor laws, regulations, and related statutory requirements for these assigned employees primarily rests with the respective clients. In the event that a client defaults or fails to fulfill the required labor law compliances for their assigned employees, Group may be required to assume responsibility and take necessary actions to ensure compliance on their behalf. This could involve engaging in corrective measures, making financial provisions, or bearing any legal consequences that may arise due to the client's non-compliance.

While Group maintains systems and procedures to monitor and encourage client compliance, it may not have direct control over the actions and decisions made by the clients. Therefore, the possibility of unforeseen contingent liabilities arising from client non-compliance cannot be completely eliminated.

d) There are no other present obligations requiring provisions in accordance with the guiding principles as enunciated in Accounting Standard (AS) - 29, "Provisions, Contingent liabilities & Contingent Assets" as it is not probable that an outflow of resources embodying economic benefits will be required.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I:

This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II:

This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III:

The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism. Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement of or SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “automatic route”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “government route”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails.

RBI has also issued Master Direction- Foreign Investment in India dated January 4, 2018. In terms of the Master Direction, an Indian company may issue fresh shares to person’s resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “U.S. Securities Act”), or the securities laws of any state of the United States and may not be offered or sold within the United States, except pursuant to exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold only outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sale occur.
